**Scott Weimer:** Schwabe - sweimer@schwabe.com (June 15, 2010)

"Excellent customer service at all times during the process. The NPS dashboard that was set up for us was easy (and FUN!) to use. Although the survey is not 100% closed yet, it is already evident that it has provided us with quality and useful information from our clients that we might not otherwise would have captured."

"Terrific, supportive staff. Great technology. Continued innovation (mobile application)."

"I would like to see an "anonymous" (initials instead of names, customer name removed, etc) PDF version of the results that we could publish on the website or send to brokers or prospects.

Also, keep me in the loop with any innovative ways to integrate the survey into our business practices/processes."

CLIENT

"Inavero really cares about its clients. It takes our suggestions for improvements to heart. The pros on staff are smart, strategic, friendly, and really great people to work with. We really appreciate their interest in continuous improvement and their looking out for our interests. We've noticed improvements with the addition of Nathan and Tracy."

"Better internal quality assurance on our reports. We shouldn't be finding factual, mathematical, or tabulation errors. Makes us worry a bit about overall accuracy."

CLIENT

**Kara Wallace:** Hudson - kara.wallace@hudson.com (June 22, 2010)

"Great customer service!"

"More notice in advance of each quarterly e-mail campaign. Just assume we are NOT going to be ready by our committed timeline, so ping us extra early. I guess I'm asking for more babysitting. It's sad, but needed at this time! ;-)

Would also be nice to have some customization of the program, so we will get a meeting to discuss soon."

"I'm a big fan of Inavero! Yes I have, and will continue to recommend Inavero as long as they continue to improve and evolve as an organization. Not to mention, they have cool contest and amazing prizes."

"Continue to enhance your overall company image and practice. Inavero should be known throughout the entire staffing industry, and I'm surprised people are still unaware when I discuss with them. Additionally, it would be nice if you had a "consultancy" arm to train and educate Recruiters and Account Managers how to receive better scores and how to differentiate from our competitors."

I don't know of any other research company that is making the strides that Inavero has in the past 2 years."
